

Autodesk Platform Services Certified Partner Application

Thank you for your interest in joining the Autodesk Platform Services Certified Partner program. The Autodesk team currently certifies partners with the ability to help third-party customers build APS solutions. Some of the benefits to being in the program are:

- Lead referral
- Featured website and newsletter content
- Early access to beta programs
- Marketing opportunities (social, email, events, etc.)

What you will need to complete this application:

- Contact information for at least 2 members of your team
- Contact information for at least 1 customer reference
- Technical details of a project you have completed in the last two years using Autodesk Platform Services. These can include:
 - Details on authentication
 - Deployment information
 - Security measures implemented
 - APIs used
- A link to a short (5 min or less) video demo of your solution
 - Please do not include confidential or non-shareable proprietary information
- About 10-15 minutes to complete the application

If you are unable to share any of this information, or if you have any questions, please contact aps.cp.program@autodesk.com.

Applicant Information

Full name (Contact #1):

Business email (Contact #1):

Full name (Contact #2):

Business email (Contact #2):

Company name:

Company size:

- 1-9 employees (micro)
- 10-49 employees (small)
- 50-249 employees (medium)
- 250+ employees (large)

Company location:

Services offered:

Locations served:

Industries served:

Other Autodesk certifications:

Customer Reference

Please provide a customer reference who can speak to the success of the solution you created.

Customer company name:

Customer contact full name:

Business email:

Customer contact phone:

Project information

What area of expertise are you applying for?

- Multi-industry
- Architecture, Engineering, & Construction
- Architecture, Engineering, & Construction – Automation
- Manufacturing

Project start date:

Project end date:

Description of the solution:

Deployment information:

- Cloud
- On-prem
- Single-tenant
- Multi-tenant
- Other (please explain:)

Security & authentication:

OAuth types:

Security measures:

Token (2-legged, 3-legged or both 2-legged & 3-legged):

APIs used:

- Construction Cloud
- BIM 360
- Data Exchange
- Data Management
- Data Visualization
- Design Automation
- Fusion Data
- Model Derivative
- Parameters
- Reality Capture
- Token Flex
- Viewer
- Webhooks
